Fitted to a RUSS MINIPACTOR the system discharges directly into the compactor body. Easy in – Easy out.

The compaction/Ejection blade has specially designed bearings to work with the dry and dusty conditions.

When you have finished your job just eject it with the compaction/ejection blade and you're ready to start again.

- ⇒ Easy to use — One man operation
- ⇒ Sufficient hose to cross the footpath
- ⇒ Easy to store for travel
- ⇒ Its there ready for use when you need it.
- ⇒ The compactor can still be used for normal rubbish collection.
- ⇒ No special tools or training required.

Versatile — High Volume — Low Cost

Park cleanups are a breeze with the TommyVac System

Trailer mounted for towing behind a car or a tractor. This unit is extremely versatile in its application.

The TommyVac system makes light work of cleaning up after conventions and shows.

Australian made with spare parts available in Australia.

With a wide range of accessories the TommyVac system can easily be adapted to meet your special requirements.

The wheeled head makes light work of using the system. You can now use the system for prolonged periods with minimal fatigue.

After the big car race or just the local show, the TommyVac system makes light work of cleaning up all those discarded bits of rubbish.
